

The tub machine is suitable for components of odd shapes and sizes. The tubs process such components with great ease. The tubs are the most versatile machines and it is available in nine standard sizes. The tub can be sub-divided to provide separate compartments for precision components.

Tub series are available in varied capacities, ranging from 85 to 565 litres.

## Features

- Tubs for shafts as long as 6500mm can be manufactured on demand.
- Sub division can be provided in the tub to avoid part on part collision.
- Robust construction ensures long life of the machine.

## Applications

- Deburring
- Polishing
- Descaling
- Super finishing
